This publication is produced by a CarbonNeutral® company and Carbon Balanced with World Land Trust.

Balancing is delivered by World Land Trust, an international conservation charity, who offset carbon emissions through the purchase and preservation of high conservation value land.

Through protecting standing forests, under threat of clearance, carbon is locked in that would otherwise be released. These protected forests are then able to continue absorbing carbon from the atmosphere, referred to as REDD (Reduced Emissions from Deforestation and forest Degradation). This is now recognised as one of the most cost-effective and swiftest ways to arrest the rise in atmospheric CO₂ and global warming effects. Additional to the carbon benefits is the flora and fauna this land preserves, including a number of species identified at risk of extinction on the IUCN Red List of Threatened Species.

Printed in the UK – printer certified CarbonNeutral®.

Vegetable based inks and water based sealants. The printer and paper manufacturing mill are both certified with ISO 14001 Environmental Management systems standards and both are Forest Stewardship Council® (FSC®) certified.
